We would like to acknowledge the following 16 reviewers for the exceptional quality and timeliness of their reviews for the year July 2006–June 2007. These reviewers did three or more reviews for the *Journal* and returned their reviews within 30 days. More importantly, the quality of their reviews was rated as very good to outstanding by our Deputy Editors. This work is important to the quality of the *Journal* and to the authors who submit their manuscripts for review—and it is often unrecognized. We want to take this opportunity to recognize you and thank you for all of your effort. —*The Editors*
